

Power Trowels/Internal Concrete Vibrators

Power Trowels/Internal Concrete Vibrators

The internal concrete vibrator MVX can be used very flexibly thanks to the choice between one drive unit, four different shaft lengths and three poker diameters.

The PG power trowels represent well-devised solutions for smoothing concrete surfaces professionally. A wide choice of attachments makes them truly versatile.

Technical data (Internal Concrete Vibrators mechanical)

Type	Weight	Poker Diameter	Engine	Engine output
MVX	13.8-23 kg	30-48 mm	electric (230 V)	1.2 kW

Technical data (Power Trowels)

Type	Weight	Working diameter	Engine
PG 55	48/53 kg	563 mm	electric (230 V)/Robin
PG 70	74/76 kg	750 mm	electric (400 V)/Robin
PG 90	78-82 kg	900 mm	electric (400 V)/Robin
PG 110	93-95 kg	1,100 mm	electric (400 V)/Robin
